

УЛЬТРАФИОЛЕТОВЫЕ ЛАМПЫ

Компания LIH является всемирно известным производителем по изготовлению ртутных ультрафиолетовых ламп среднего давления, с различными спектральными характеристиками, с мощностями от нескольких Ватт до 40 кВт (возможны другие УФ лампы по желанию и параметрам заказчика).

Надёжность и качество продукции, произведённой на заводе в Германии, соответствует всем требованиям и правилам мировых рынков.

Компания LIH производит более чем ста различных типов ультрафиолетовых ламп среднего давления на основе ртути.

Лампы различаются по мощности, геометрии и спектральным характеристикам (электрическим параметрам).

Все источники ультрафиолетового излучения выполнены в соответствии с высокими стандартами качества.

Из таблицы выше следует, что лампы используются в печатном производстве, деревообрабатывающей промышленности, лакокрасочной отрасли, а также для обеззараживания воды.

Если в нашей таблице Вы не нашли нужную лампу, то будем рады получить от Вас заполненный бланк клиента по УФ лампе, с целью индивидуального подбора источника УФ излучения.
